WISE CARE

24/7 MANAGEMENT OF YOUR IT INFRASTRUCTURE.

Businesses need to maximize the productivity of their operations and technology tools are an essential resource for employee productivity. However, unreliable and poorly supported IT infrastructure results in downtime, costly mistakes and dissatisfied customers. OpenGate provides you pro-active WiseCare of your IT infrastructure 24/7. Our flat rate easy-to budget plans are tailored to support all workstations, servers & network equipment.

WISE **CARE**

24/7 MANAGEMENT OF YOUR IT INFRASTRUCTURE.

An important part of your company's success is based on the health of your IT infrastructure. OpenGate becomes responsible for the care of your technology health, managing your security, spam, virus protection as well as administering patches from manufacturers. Tasking your employees with attempting to stay on top of supporting your technology, as well as do their core duties is a daunting task that frequently turns reactionary versus pro-active. The result is money spent on bandaids and technology planning is overlooked. Let OpenGate's responsive and technically proficient engineers make your life easier.

THE PULSE OF YOUR
BUSINESS

We effectively become your company's IT department or an extension of IT. Many in-house IT groups are bogged down with daily support tasks that keep them so leveraged they cannot accomplish key technology objectives. Our WiseCare support functions are cost effective ways to allow your company to re-deploy IT resources to critical functions.
