

WISE VAULT

SECURE HYBRID DATA BACKUP
SOLUTION

Don't allow yourself to be fooled into thinking that backing up your data on tapes, cds, or an employee taking them offsite is a safe reliable BDR (Backup Disaster Recovery) solution. The most important part of any data backup is its ultimate recovery. If the data you captured is incomplete or put on unreliable media, or sent to an unaccountable cloud based provider, then you may find yourself in a situation with unrecoverable data.

RECOVERING YOUR DATA **COMPLETELY** AND **QUICKLY** IS KEY.

WISE VAULT

SECURE HYBRID DATA
BACKUP SOLUTION

Many Businesses are adversely impacted following a disaster resulting from not being able to recover their critical data. This solution can store backups on both local appliances and/or on our remote servers. OpenGate can seamlessly virtualize your backup to potentially get your business up and running in an hour or less.

MORE THAN \$100,000
ANNUALLY ON DISASTER

Data backup and recovery not only ensures that your business is protected if the worst should happen, it also is able to recover your data for you whenever you need it. The second part of data backup is being to able access that data in the event of a disaster, and that is exactly what data recovery is all about. Including cost savings, there are many advantages of making sure your business is protected from potential threats and disasters.
